### More information about the courses

[Link](#)

### Target groups

- ✓ Students (BSc, MSc, PhD)
- ✓ Professionals working in private, public and NGO sector

**Start:** 15 January 2021

**Number of participants per course:** 20

**Recognition/certification of participation:** All participants will receive an international certificate for attendance/completion of the course for 60h (equivalent to 2 ECT)

### Working methods

To be successful, this will require participants to have an active engagement in sharing their own experience on the All4R&D platform with international peers, and be willing to learn new skills from professors from academia and industry. The working methods will include digital tools for online learning, innovative and interactive methods of learning live video sessions, consultation hours etc.

If you are interested to participate in the courses, you can apply through our [Registration form](#) by **25 December 2020**.

We are pleased to announce that in scope of the All4R&D project 50 professional courses have been developed. The courses are tailored-made, based on the assessed needs of students and professionals, and trends in industry. The courses are co-created and are offered in joint collaboration of academic and business organisations from 6 countries (Armenia, Bosnia and Herzegovina, North Macedonia, Germany, Finland and Austria). In the first open call, we offer 25 courses in six categories, free of charge. All courses will be in English and employ innovative teaching methods. More information about the organisations can be found [here](#).

The aim of the project “*Promoting academia-industry alliances for R&D through collaborative and open innovation platform*” (All4R&D) is to accelerate research, innovation, knowledge and technology transfer in Bosnia and Herzegovina and Armenia through enhancing strategic academia-industry alliances. The project is co-funded by the Erasmus+ Program. You can find more information about our project [here](#).

The project All4R&D has a strong focus on being inclusive and interdisciplinary, so participants are allowed to attend courses from different disciplines. We are giving our best to ensure the equal opportunities for all applicants and participants. We do not discriminate on the ground of religion, gender, sexual orientation, race, ethnicity, disability, health status or any other ground.

**Organised by:** All4R&D Consortium
